Experience

Software Engineer, Wells Fargo – Hyderabad, India

August 2024 – Present

- Modernized the Commercial Cards and ACH domain into scalable, concurrent **Java 17** and **Spring Boot** microservices, reducing technical debt by 20% and accelerating delivery timelines by 30% using GitHub Copilot and Prompt Engineering techniques.
- Replaced manual database updates, system approvals, and email notifications with automated pipelines, deployed as **Kubernetes batch jobs** and triggered via **Autosys** while achieving a 99.9% success rate through fault-tolerant retry mechanisms.
- Architected low-latency, high-throughput event streaming solutions utilizing **Apache Kafka** and **IBM MQ** to decouple legacy mainframes, guaranteeing 100% eventual consistency for high-volume data across distributed systems.
- Built highly fail-safe and resilient RESTful services, attaining 99.99% API availability and safeguarding business continuity by orchestrating containerized microservices across multi-region geo-redundant data centers via **Kubernetes**.

Intern Analyst, Wells Fargo – Hyderabad, India

May 2023 – July 2023

- Engineered a Long Short-Term Memory (**LSTM**) neural network in **Python** to automate customer liquidity forecasting across millions of records, delivering 95% predictive accuracy and decreasing manual ETL processing efforts by 40%.

Skills

Languages: Java, Python, C++ , Kotlin, JavaScript, SQL, Bash

Backend & Frameworks: Spring Boot 3, Spring Batch 5, React.js, Next.js, Node.js

Distributed Systems & Cloud: Apache Kafka, IBM MQ, Kubernetes, Docker, GCP (Cloud Run, Vertex AI), AWS (SageMaker), OpenShift

AI & ML: Large Language Models (LLMs), Prompt Engineering, Transformer Architecture, PyTorch, RLHF, Retrieval-Augmented Generation (RAG), LLM Orchestration (LangChain)

AI Architecture: Agentic Workflows, Google Agent Development Kit, Model Context Protocol (MCP)

Databases, CI/CD & Automation: Oracle SQL, PostgreSQL, MongoDB, BigQuery, Git, GitHub Actions, Jenkins, Harness, Autosys

Concepts: Microservices, Concurrency, Distributed Systems, Data Structures & Algorithms, Basic Cryptography

Non-Technical: Microsoft Excel, Agile/Scrum, Organization, Problem-Solving, Prioritization

Education

National Institute of Technology (NIT), Durgapur

Graduated: 2024

- B.Tech in Computer Science and Engineering – CGPA: 8.65

Certifications

Generative AI with Large Language Models – DeepLearning.AI and Amazon Web Services

2026

- Credential:** coursera.org/verify/XIHPU6NPQ9AR

Model Context Protocol (MCP): Advanced Topics – Anthropic Education

2026

- Credential:** verify.skilljar.com/c/5vy3s37ym775

Projects

Stock Analyst AI Microservice

github.com/kaushal168/market-sentiment-llm

- Engineered a zero-to-n auto-scaling REST API on **Google Cloud Run** for real-time market sentiment analysis, utilizing **Google Agent Development Kit (ADK)** to transform unstructured news headlines into strictly validated **Pydantic** JSON schemas containing actionable trading signals, polarity metrics, confidence scores and contextual rationale.

AI Job Search Automation Pipeline

github.com/kaushal168/job-hunter-ai

- Automated the daily ingestion of job postings by building a serverless **Python** pipeline, leveraging **LLMs** to autonomously filter and evaluate ideal opportunities.
- Developed a headless document generation engine using **Tectonic** and **GitHub Actions** to dynamically compile LaTeX resumes tailored by LLMs into ATS-optimized PDFs, automating delivery via secure **SMTP**.

Real-Time Obstacle Detection App for the Visually Impaired

github.com/kaushal168/Obstacle-Detection

- Built an affordable real-time assistive application using **Kotlin** and **Google ARCore** to process complex spatial data, implementing low-latency voice feedback loops for near-instantaneous obstacle warnings during active navigation.

Scalable Blog

github.com/lcnitdgp/darkestwhite2022

- Architected a high-concurrency full-stack platform combining a **React.js** UI with a **Node.js** backend, featuring secure, high-performance **RESTful APIs** supporting JWT authentication and Role-Based Access Control (RBAC).

Achievements & Leadership

Competitive Programming: LeetCode Rating 2172 (Top 1%), CodeChef 1711, Codeforces Pupil.

Winner, Techade Tech Quiz (IEEEELink Kerala) & Tech QuizMaster (TEDx GGSIPU) – *Ranked 1st among 1000+ participants.*

Best College Team, Madras Minutiae Open Quiz 2021 (IIT Madras).

Winner, Inter-NIT MELA Quiz 2021.

President @ Literary Circle, NIT Durgapur

May 2023 – April 2024

- Spearheaded TEDx and the university's largest literary festival, leading a cross-functional team of 50+ members.

Vice President @ QuizInc, NIT Durgapur

May 2023 – April 2024

- Directed content strategy and logistics for 10+ competitive events.
